Traineeships

Traineeships programmes are for young people struggling to enter the world of work with their existing qualifications.

Through practical experience, traineeships teach you the ins and outs of an industry and provide insight into the typical tasks you will be expected to undertake in full-time employment with a payment incentive.

This placement can be from 3-6 months, with employment just one of the possible options at the end. If your maths and English grades weren't up to par, you will also benefit from additional support to boost your career prospects and improve your literacy and numeracy up to level 2.

Enrol today if you are aged 16-18 and not qualified at level 3 (A-levels, Btec, etc).
